Time Meeting
June 7th, 2016

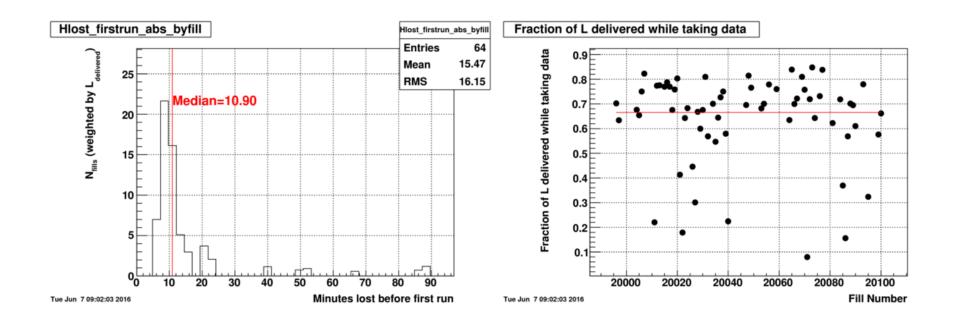

## d+Au 19.6 GeV Sampled Luminosity

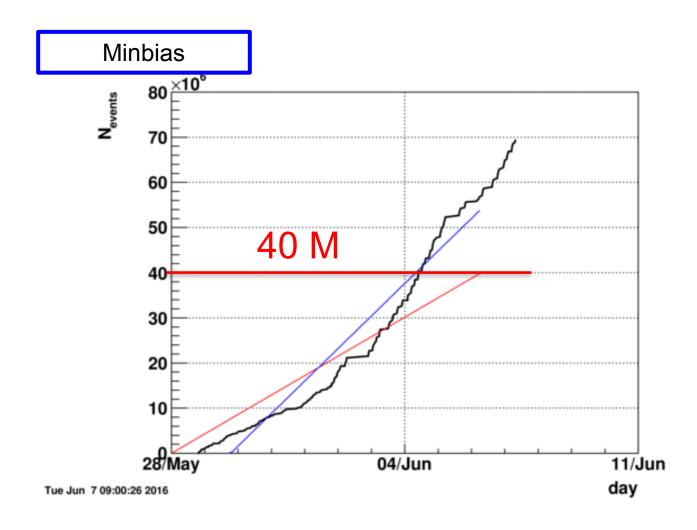

• STAR Daq system runs stably

## Operation Efficiency

Start to take data once background is good

## d+Au 19.6 GeV Sampled Luminosity

• We accumulate sufficient data for our physics goals

## Preparation for d+Au 39GeV

- Goal: 80M good MinBias events
- Estimation: 1 week or less
